SUMMARY

Full-stack developer who designs, builds and ships production applications end to end — TypeScript and React on the client, Node.js serverless services and Firestore / SQL data modelling on the server. Sole developer of a 24,000-line React Native field-operations platform (59 screens, 32 Cloud Functions) deployed across nine countries, in security-conscious, DoD / DFARS-regulated environments.

TECHNICAL SKILLS

Languages TypeScript (strict), JavaScript (ES6+), Python, SQL, PHP, Java, C/C++

Frontend React 19, React Native / Expo, React Navigation v7, Reanimated, HTML5, CSS3

Backend Node.js 22, Firebase Cloud Functions, REST API design, MySQL, Google Cloud SQL, Firestore (NoSQL)

Cloud & DevOps Firebase (Auth, Firestore, Storage, FCM), Google Cloud VPC, EAS build pipeline, cPanel / SSH / Linux, WordPress, Git / GitHub

Security TOTP MFA (otplib), RBAC, signed-URL delivery, VirusTotal scanning, NIST SP 800-171 / DFARS, CMMC L2

AI & Automation Claude Vision API, faster-whisper, Ollama, ReportLab, ppxgenjs, nodemailer

EXPERIENCE

Full-Stack Developer & IT Administrator

Aug 2018 – Present

Gulf Project Solutions Co. W.L.L., Kuwait — Sole technical owner for a multi-country logistics & support-services provider to US DoD primes (Northrop Grumman, CACI, GDIT, Raytheon).

GPS Field Operations Platform — React Native / Firebase, sole developer

- ▶ Architected and shipped a cross-platform app as sole developer — **~24,000 lines of strict TypeScript across 59 screens**, deployed across 9 countries via an EAS build pipeline.
- ▶ Built the serverless backend: **32 Node 22 Cloud Functions** over a 16-collection Firestore model, Cloud Storage and FCM push, with security rules enforcing five permission tiers.
- ▶ Delivered a **client-facing maintenance ticketing system** (fleet, accommodation, IT) routed per country across the GCC — bridging the legacy osTicket PHP/MySQL helpdesk via a VPC connector with a static egress IP into one unified staff queue.
- ▶ Implemented **TOTP multi-factor authentication from primitives** (otplib, enrolment QR codes, email OTP fallback, 30-day trusted devices, progressive logout).
- ▶ Integrated the **Claude Vision API** to compare vehicle delivery/return photos and flag new damage; offline-first on-device PDF generation for handovers.
- ▶ Hardened the client to DFARS / NIST SP 800-171 — credentials proxied through authenticated Cloud Functions, short-lived signed URLs, and VirusTotal upload scanning.

Additional Development & Automation

- ▶ **QuoteFlow** — RFQ-to-quote web app: monitors Outlook, parses RFQs with AI, resolves pricing from Smartsheet, and generates branded ReportLab PDFs through a dual-gate approval workflow.
- ▶ **Voice-to-ticket pipeline** — faster-whisper STT + a locally hosted Qwen2.5 model for field extraction, writing structured osTicket tickets via REST with audit logging.
- ▶ Built and maintain the corporate website on **WordPress (gps-gulf.com)** and the osTicket service desk on an InMotion Hosting stack (cPanel, SSH, MySQL).

IT, Security & Infrastructure

- ▶ Authored the IT policy set for CMMC Level 1 & 2 (NIST SP 800-171) and ran the Level 2 self-assessment to a **110/110 SPRS score** (UID S200028618).
- ▶ Managed **700+ voice and data lines** across Zain, STC and Ooredoo; administer local QuickBooks accounting servers with secure multi-country remote access; engineered the corporate network (Cisco, Fortinet, Windows Server AD, IPsec VPN) across country sites.

Software Development Intern

Aug 2017 – Oct 2017

Gold Farm, India

- ▶ Developed Android features and React.js web interfaces in a multi-developer team; managed Git/GitHub version control and pre-merge testing.

EDUCATION

B.Tech, Information Technology

2013 – 2017

Vellore Institute of Technology, India — Final-year project: AES encryption with multi-authority verification for secure public cloud storage.

CERTIFICATIONS & ADDITIONAL

Certification Cisco Certified Network Associate (CCNA) — July 2018

Languages English, Tamil, Hindi

Work Authorization Kuwait Article 18 residency (transferable)

Availability 3 months notice · remote or relocation
